Magic and science collide during fun day at
Brigidine School Windsor

Every witch way

WITCHES, fairies and magical beings gathered at a school for a magical science day.

Brigidine School pupils from years five and six, and pupils from other local schools as well as older spellbound students with ruffled hems, big hair and gory make-up, all got together to learn about fun science and to create enchanting treasures in the laboratories.

Pupils decorated grass

heads, made silly putty, floated boats and flew mice at the event, on Tuesday last week under the guidance of black-robed 'Brigwatts' staff.

Izzy Anderson, 11, said: "The whole day was fascinating. I learned a lot. My favourite part was making silly putty; it was

really cool and even more so than I made it."

Susie Clark, a science laboratory technician at the school in King's Road, Windsor, said: "The scientists devised the celebration day and their formula produced a memorable concoction."

A show presented the experiments with a broomstick 'Witch Dance' and a 'Could it be magic?' musical finale.

Soak it to them: Emma Heines, 10, with a so-called Harry Potter sock, above.

Putty in their hands: Isobel Frost and Saira El-Sorji make putty, left, as do Daisy Sullivan and Izzy Anderson, above.
