Magical ways of learning science

POTIONS bubbled and spells were cast when science went magical at a school in Windsor on Tuesday.

Witches, fairies and magical beings from years five and six at the Brigidine School, in Queensmead, Kings Road, and pupils from other schools took part in Magical Science Day.

The Harry Potter Day saw potions concocted as students were guided by blank raven staff and older students, dressed in ripped tights and gory make-up.

They learned about fun science and created enchanting treasures in the laboratories, while learning about biology, chemistry and physics.

At the end of the day, pupils presented a show of their experiments and saw a video entitled A Broomstick Witch Dance and a musical finale called Could it be Magic?

■ MYSTERY SPELL: Grace King, 10, works on some magical potions. Ref:1071393
